

Call Quality

Can they hear you?

Whether it is resolving a customer's problem or closing that next big sale, a poor quality phone connection can ruin how your customers perceive your business. Jaduka's communication services provide the high level of call quality that your business demands. We achieve industry-leading quality through the use of iQTechnology® (iQT), patented and deployed by our parent company, NetworkIP.

What is iQT®?

iQT constantly monitors, analyzes, and enhances call quality based on real-time consumer experience. Your customers deserve quality phone calls with you, every time, all the time. **Rest assured, iQT will deliver consistently better call quality and satisfied customers.**
